SUMMARY OF INTERVIEW

Representative Showalter argued that the claims included (1) an automated communications and reporting of position fixes and odometer readings, since the configurable condition is a repeatable condition (note page 10, line 34, to page 11, line 4: "In general ... 40."); and (2) that there is an apportionment of taxes as necessary between two consecutive position fixes, (note claim 58). Representative Showalter argued further in regard to point (1) the communications of Gooch (5,396,540) are initiated by the operator and not at a repeatable condition and in regard to point (2) the tax data of Haendel et al (5,359,528) is downloaded only once at the end of the day (note column 3, lines 31-34, "Step 207 ... information."). The examiner agreed that the combination of Gooch ('540) and Haendel et al ('528) does provide a system which would work as claimed. In view of this the examiner indicated that the outstanding rejection of claims 38-79 under 35 U.S.C. § 103 would be withdrawn upon applicant submission of a formal response including these arguments. This determination is subject to a further updated search.
